First title of new ULLA series published

Pharmaceutical Toxicology now available

Pharmaceutical Press has announced the publication of the first title in the ULLA postgraduate pharmacy series, *Pharmaceutical Toxicology*, edited by Gerard J Mulder and Lennart Dencker.

The ULLA series is a new and innovative series of introductory textbooks for postgraduate students in pharmacy and the pharmaceutical sciences by the ULLA Consortium.

Editors-in-Chief for the first titles are Professor Alexander T Florence and Professor Anthony C Moffat, both of The School of Pharmacy, University of London, UK. The retirement of Professor Florence has allowed Professor Anthony Smith (Dean of London School of Pharmacy) to join Professor Moffat as Editor-in-Chief for the later books.

The titles in this new groundbreaking series are aimed at PhD students but will also appeal to postgraduate students undertaking masters or diploma courses, undergraduates for specific courses and practising pharmaceutical scientists. Initial titles will include *Pharmaceutical Toxicology*, *Paediatric Drug Handling*, *Molecular Biopharmaceutics*, *Proetomics and Metabolomics in Pharmaceutical Science* and *Biomedical and Pharmaceutical Polymers*.

Professor Tony Moffat, from The School of Pharmacy, University of London said: "This is an exciting new venture between the Pharmaceutical Press and the ULLA Consortium. The concept is to have a series of textbooks in different subject areas aimed at science graduates entering a PhD programme in the pharmaceutical sciences. The books will be both an introduction to the subject as well as a source of references for further reading and information".

Paul Weller, Director of Development at Pharmaceutical Press, said: "We are delighted to be working with the ULLA Consortium in the development of this important new series. Many individuals worldwide embark on post-graduate courses in the pharmaceutical sciences and would benefit from access to reasonably priced introductory texts on specific areas of pharmaceutical science".

Pharmaceutical Toxicology is a textbook with a focus on medicinal drugs. It covers the most important safety issues of drugs including mechanisms of toxicity and registration requirements. It is now available for purchase at www.pharmpress.com.

Notes to editors

The ULLA Consortium (European University Consortium for Advanced Pharmaceutical Education and Research) is a European academic collaboration in research and teaching of the pharmaceutical sciences that is constantly growing and expanding. The Consortium was founded in 1990 and consists of pharmacy departments from leading universities throughout Europe:

Faculty of Pharmacy, University of Uppsala, Sweden

The School of Pharmacy, University of London, UK

Leiden/Amsterdam Centre for Drug Research, University of Leiden, The Netherlands

Leiden/Amsterdam Centre for Drug Research, Vrije Universiteit Amsterdam, The Netherlands

The Danish University of Pharmaceutical Sciences, Copenhagen, Denmark

Faculty of Pharmacy, University Paris-Sud, France

University of Parma, Italy

Pharmaceutical Press is the publications department of the Royal Pharmaceutical Society of Great Britain.

The Royal Pharmaceutical Society of Great Britain is the regulatory and professional body for pharmacists in Great Britain.
